## MY LISTENING HABITS

50000

Total Streaming Minutes

1500

Different Songs

180

Different Artists

Between MM/DD/YYYY and MM/DD/YY

☒ ALL MY MUSIC ☐ TOP 50 ONLY

1-01-2023

12-31-2023

line plot showing how many minutes I listened to each day over the course of the data

- corresponds to the time frame selected
- can be filtered based on when I was listening to the music (morning, afternoon, or night)
- maybe can add annotations that point out the highest and lowest days

☒ MORNING

☒ AFTERNOON

☒ NIGHT

not exactly sure what I want this plot to be yet

space for interaction with unknown graph 1

## GLOBAL LISTENING

scatter plot that have a metric from the global data set on either axis.

- x axis and y axis can be changed to be different metrics
- maybe make it so that whatever is on the x axis cannot be selected on the y axis

x axis metric

y axis metric
